FIGURE 14

Figure 15 is a screenshot of a graphical user interface (GUI) for managing packages. The interface is divided into several sections. At the top, there are tabs labeled "Services", "Packages", "IPs", "Machines", and "Actions". Below these, the "Edit Existing Package" section is active, showing a "Package Name" field with the value "lms" and an "Update Package" button. A link "[Return to Package list]" is also visible. The "Version(s)" section on the left displays a list of versions: 4.0.1, 5.0.a10, 5.0.a12, 5.0.a13, 5.0.a19.1, 5.0.a20, 5.0.a25, 5.0.a7, 5.0.a8.1, and 5.0.a9. To the right of this list are buttons for "Edit Version" and "Delete Version". The "Add Version" section on the right includes a "Version:" field with the value "I", a "Comment:" field, and buttons for "Add Version" and "Clear". Various reference numerals (1502, 1504, 1508, 1510, 1514, 1516, 1518) are placed around the interface elements.

Services	Packages	IPs	Machines	(Actions)
----------	----------	-----	----------	-----------

Review Actions

Select the radio button for the latest action to be committed.

2104

☒ (commit none)

Action	Description	User	Timestamp
2106	add package: zip	pjl	13-APR-2000 11:34
2108	add package version: zip-1.0	pjl	13-APR-2000 11:34

2100

Software will be deployed only for actions where ANY ONE of the following is true:

1. An IP address with a service assigned to it is assigned to a machine.
2. A service is assigned to an IP address (that is assigned to a machine).
3. A package is added to a service (that is assigned to an IP address that is assigned to a machine).
4. A package has been added as a dependency to a package that is used by a service (that is assigned to an IP address that is assigned to a machine).

Non-committed actions WILL BE ROLLED BACK.
